Professional profile

As a User Experience Designer, I have the skills to design and create the appropriate flow of user-centered factors when developing software projects or technology tools, I am dedicated to the areas of user-centered design and human-computer interaction, such as user research, user experience design, information architecture, interaction design and usability testing.

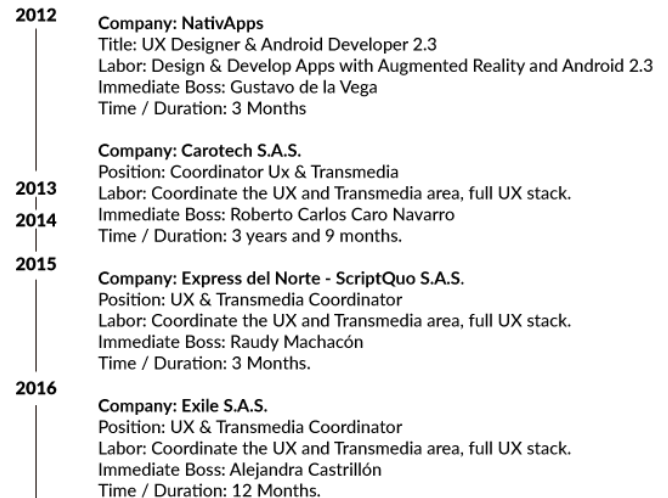

I have earned experience in the field with engineers from the industrial, economic and cultural sectors, leading the area of UX & Business Analysis, which has been my area of expertise.
